CAREER OBJECTIVE

Recent B.Tech ECE graduate (2026) with hands-on experience in Python, Flask, and full-stack web development, and a working knowledge of Generative AI and REST API integration. Skilled at designing and deploying end-to-end web applications, including e-commerce platforms and GenAI-powered tools. Seeking a Python Developer / Software Developer / Full Stack Developer role to apply strong programming and problem-solving skills in a product-driven engineering team.

EDUCATION

B.Tech in Electronics and Communication Engineering (ECE) — Narasaraopet Institute of Technology | CGPA: 8.4/10 *2022 - 2026*

Intermediate (MPC) — 76% | SSC — 94% *2019 - 2022*

TECHNICAL SKILLS

Programming Languages: Python,
Web Technologies: Flask, HTML, CSS, JavaScript, Bootstrap, REST APIs
Databases: SQL, MySQL, SQLite
AI / Frameworks: Generative AI, Prompt Engineering, LLM
Tools & Platforms: Git, GitHub, VS Code, Render
Soft Skills: Communication, Team Collaboration, Time Management, Problem Solving

PROJECTS

SmartCart — E-Commerce Web Application | Python, Flask, MySQL, HTML, CSS, JS, Bootstrap

- Developed a full-stack, Amazon-style e-commerce application with dedicated User and Admin modules, supporting end-to-end CRUD-based product and order management.
- Integrated the Razorpay payment gateway for secure online transactions and built automated invoice generation and download.
- Designed secure authentication and session handling for customer and admin accounts; deployed live at smartcart-pmat.onrender.com.

AI Learning Roadmap Generator | Python, Streamlit, Generative AI

- Built a GenAI-powered web application using Streamlit that generates personalized learning roadmaps from user input.
- Applied prompt engineering techniques to design effective LLM API calls, with an interactive UI for defining learning goals.

Employee & Notes Management Systems | Python, Flask, SQL

- Built CRUD-based employee and notes management applications with structured relational databases and secure user authentication.

INTERNSHIPS & TRAINING

Python Full Stack Trainee — Codegnan IT Solutions *Apr 2026 - Aug 2026*

- Undergoing hands-on training in Python full-stack development — Flask, REST APIs, and database integration — while building live projects with Python, SQL, HTML, CSS, and JavaScript.

Web Development Intern — Naresh Technologies *May 2025 - Jun 2025*

- Built static and responsive web pages using HTML, CSS, and JavaScript, improving layout, UX, and interactive features.

CERTIFICATIONS

- Workshop on Full Stack Web Technology
- Workshop on Python Programming
- NPTEL — Introduction to the Internet of Things
